

EYE-VAPOMETER

PRACTICAL AND RELIABLE TEAR EVAPORATION RATE MEASUREMENTS

The Eye-VapoMeter is the first and only portable instrument to measure tear evaporation rate (TER) easily. TER can change for example when suffering from dry eye syndrome or wearing contact lenses. Efficacy of eye drops or other treatments can also be followed by measuring TER.

PRODUCT BENEFITS

- Fixed rotatable adapter fits perfectly on the eye
- Wide measurement range up to 300 g/m²h without saturation
- Short measurement time, typically 15-20 sec
- Closed chamber – non-sensitive to ambient airflows
- Fully portable and battery operated – no cables
- Wireless connection to PC
